SHIVAYOGI HIREMATH

LEAD ANDROID ENGINEER | Kotlin | Jetpack Compose | Clean Architecture | MVVM/MVI

Bengaluru, India | +91 7760902997 | shivayogih72@gmail.com | linkedin.com/in/shivayogi-h-45784594 | medium.com/@shivayogih25

Immediate Joiner | Bengaluru | Open to Hybrid, Remote and Suitable Relocation Opportunities

PROFESSIONAL SUMMARY

Lead Android Engineer with 8+ years building large-scale Kotlin and Jetpack Compose applications for Royal Caribbean, Walmart's Sam's Club, and Emirates NBD. Owns architecture decisions across MVVM/MVI and Clean Architecture for secure, scalable, offline-first applications serving millions of users. Mentors engineering teams and drives code quality through structured code reviews and architecture discussions. Experienced across enterprise banking, retail, hospitality, and consumer product platforms. Immediate joiner, based in Bengaluru.

CORE TECHNICAL SKILLS

Android Development: Kotlin, Java, Android SDK, Jetpack Compose, Material 3, Navigation, ViewModel, LiveData, StateFlow, Multi-Module Architecture

Architecture and Design: MVVM, MVI, Clean Architecture, SOLID Principles, Repository Pattern, Use Case Pattern, Offline-First Architecture

Asynchronous Programming: Coroutines, Flow, RxJava

Networking and APIs: Retrofit, OkHttp, REST APIs, GraphQL, WebSocket, MQTT

Local Storage and Background Processing: Room Database, WorkManager, DataStore, Paging 3

Dependency Injection: Hilt, Dagger 2, Koin

Testing: JUnit, Mockito, MockK, Appium, UI Automation

Security: OAuth 2.0, JWT, Android Keystore, Biometric Authentication, SSL/Certificate Pinning, ProGuard/R8, Encryption

CI/CD and Developer Tools: Git, GitHub Actions, Jenkins, Gradle, Android Studio, Postman, Jira, Confluence

Analytics and Cloud Services: Firebase (Firestore, Realtime Database, Crashlytics, Firebase Cloud Messaging, Authentication, Deep Links), AWS (Amplify, S3), Google Maps SDK, CleverTap, Mixpanel, Google Analytics

PROFESSIONAL EXPERIENCE

Pyramid IT Consulting Pvt. Ltd.

Client: Cognizant Technology Solutions | End Client: Royal Caribbean Group

Lead Android Developer Nov 2025 – Jun 2026 | Bengaluru, India

Project: *Royal Caribbean International — consumer mobile app for cruise booking, digital check-in, onboard planning, and guest experiences, serving millions of users.*

Link: play.google.com/store/apps/details?id=com.rccl.royalcaribbean

- Led Kotlin and Jetpack Compose feature delivery across booking, digital check-in, and onboard-experience modules for Royal Caribbean's consumer application serving millions of guests.
- Architected reusable, scalable components and integrated secure REST and GraphQL services across booking, reservations, and guest-experience workflows.
- Owned code reviews and architecture discussions, identifying anti-patterns and performance issues before release.
- Mentored a team of 8 developers on Clean Architecture and MVVM/MVI standards, improving code quality and reducing rework.
- Integrated GitHub Copilot and Google Gemini into the team's development workflow, reducing routine coding time by 30% while maintaining architecture standards.

Synechron Technologies Pvt. Ltd.

Client: Emirates NBD

Senior Associate – Android Engineering Apr 2025 – Jul 2025 | Bengaluru, India

Project: *ENBD Business Online X — enterprise digital banking platform for business banking and corporate payments.*

Link: play.google.com/store/apps/details?id=com.enbd.cbxbusinessonline

- Owned the Payments module end-to-end, covering business logic, UI, and backend integration for a live banking application.
- Delivered secure, compliant payment workflows using Kotlin, Jetpack Compose, and MVVM/MVI within an enterprise banking environment.

- Automated UI regression testing with Appium, catching defects before release and delivering ahead of schedule.
- Collaborated with backend, QA, and DevOps teams using Jenkins CI/CD to maintain release quality.
- Client engagement concluded following project release.

Collabera Technologies Pvt. Ltd.

Client: Walmart Global Technology Services India Pvt. Ltd.

Lead Software Engineer – Android Aug 2024 – Feb 2025 | Bengaluru, India

Project: *Sam's Club — large-scale retail and membership app spanning shopping, pharmacy, and digital memberships.*

Link: play.google.com/store/apps/details?id=com.rfi.sams.android

- Delivered pharmacy and wellness module features for Sam's Club's Android application within a cross-functional team spanning iOS, backend, QA, and design.
- Built the Photos feature and integrated GraphQL services, improving performance and maintainability.
- Implemented deep linking and reusable component patterns to standardize feature delivery across teams.
- Assessed codebase feasibility for unifying Walmart's and Sam's Club's shared wellness and pharmacy functionality, informing a broader architecture initiative.

TropoGo Technologies Pvt. Ltd.

Lead Software Engineer Nov 2020 – Feb 2024 | Bengaluru, India

Project: *TropoGo — India's drone ecosystem super app spanning insurance, pilot training, marketplace, mapping, and flight logbooks.*

Link: play.google.com/store/apps/details?id=com.tropogoinsurance

- Owned the Android platform end-to-end at a product-based startup for over three years, from early development through stable release.
- Migrated the full codebase from Java to Kotlin and Clean Architecture, introducing Room, WorkManager, Paging, and Navigation.
- Designed offline-first data sync using Room and WorkManager for reliable performance in low-connectivity field conditions.
- Integrated Google Maps SDK, payment gateways, and real-time WebSocket-based features.
- Owned timeline estimation, feature delivery, and Play Store releases across the full product lifecycle, leading a growing Android team.

Neumsoft Innovations Pvt. Ltd.

Senior Android Developer Mar 2019 – Mar 2020 | Bengaluru, India

Project: *Maharah/Maher — home services marketplace connecting customers with service providers.*

Link: play.google.com/store/apps/details?id=com.maharah.maharahApp (Maharah – customer app)

Link: play.google.com/store/apps/details?id=com.maharah.vander (Maher – provider app)

- Led a team of 4 Android developers building Maharah (customer-facing) and Maher (service-provider-facing) apps for a home services marketplace, sharing a reusable architecture across both.
- Integrated Room, Firebase, MQTT, Google Maps, and payment gateways for real-time job tracking and secure in-app payments.

Digiretail Software India Pvt. Ltd.

Senior Software Engineer – Android Jan 2017 – Feb 2019 | Bengaluru, India

Project: *MyDukan — retail commerce platform for vendors: pricing, invoicing, and inventory management.*

Link: mydukan.in.aptoide.com/app

- Took full end-to-end ownership of MyDukan, a retail commerce platform for vendors, working directly with the CEO and Product Owner on roadmap and strategy.
- Resolved a major Firebase billing issue within the first 3 days by fixing unoptimized database calls and redundant API requests.
- Shipped a monetization strategy and engagement features that grew the app to 200,000+ users with an 80% increase in daily active usage.
- Hired and led a growing Android team; led the backend migration from Firebase to AWS.

EDUCATION

B.E. in Electronics and Communication Engineering — Visvesvaraya Technological University, Govt. Engineering College, Haveri — 2015
