Shivayogi Hiremath

Lead Android Developer · Senior Android Engineer · Mobile Architect

Bengaluru, Karnataka, India | shivayogih72@gmail.com | github.com/shivayogih

PROFESSIONAL SUMMARY

Senior and Lead Android engineer with professional Android development experience since 2017. I design maintainable mobile platforms, guide delivery across complex product areas, and stay hands-on from architecture and implementation through testing, performance work, and release support.

CORE SKILLS

Kotlin · Java · Android SDK · Jetpack Compose · Coroutines · Flow · MVVM · MVI · Clean Architecture · Modularisation · Hilt · Dagger · Koin · REST · GraphQL · Room · DataStore · Testing · CI/CD · Code review · Mentoring

RELEVANT EXPERIENCE

Lead Android Developer — Nov 2025 – Jun 2026

Pyramid IT Consulting / Cognizant | Client: Royal Caribbean Group

Led hands-on Android delivery for a large travel and hospitality application, with work kept deliberately high level to respect client confidentiality.

- Built Kotlin and Jetpack Compose features using MVVM, MVI, and Clean Architecture patterns.
- Integrated REST and GraphQL services with Coroutines and Flow.

Senior Associate – Technology / Android Engineer — Apr 2025 – Jul 2025

Synechron | Client: Emirates NBD

Delivered Android payment workflows within an enterprise banking product while collaborating across engineering and quality disciplines.

- Implemented payment workflows with Kotlin, Compose, MVVM, and MVI.
- Integrated APIs using RxJava and RxKotlin with Koin-based dependency injection.

Lead / Senior Android Engineer — Aug 2024 – Feb 2025

Ascendion / Collabera | Client: Walmart — Sam’s Club

Contributed to modular retail application flows spanning pharmacy, authentication, photos, protection plans, and platform routing.

- Worked on pharmacy flows including date-of-birth validation, prescription transfer, and family-member features.
- Supported two-factor authentication and Photos PrintBox single sign-on integrations.

Lead Software Engineer – Android — Nov 2020 – Feb 2024

TropoGo Technologies

Owned hands-on Android architecture and delivery across mobility and productivity products from feature development through release management.

- Developed Kotlin and Java applications with maps, location, OTP authentication, notifications, and offline support.
- Built BLE, file, and PDF workflows for mobile use cases.

Experience · Projects · Education

EARLIER EXPERIENCE

Android Software Engineer
Aug 2020 – Oct 2020

Smarter Biz Technologies

Professional Android engineering role, retained in the full timeline and intentionally condensed where further verified detail is unavailable.

Senior Android Developer
Mar 2019 – Mar 2020

NeumSoft Innovations

Senior Android development role, retained in the full timeline and intentionally condensed where further verified detail is unavailable.

Senior Software Developer
Jan 2017 – Feb 2019

DigiRetails Software India

Android software development role marking the beginning of the verified professional timeline in 2017.

SELECTED PROJECTS

Toolly
Private product — active development

An offline-first document scanning and productivity utility designed around private, on-device workflows.

DataLoom
Public — active pre-V1 development

A deterministic synchronisation SDK foundation for native Android and Kotlin Multiplatform applications targeting Android and iOS.

GalaxyGaze
Portfolio project — source link unverified

A NASA Astronomy Picture of the Day application demonstrating resilient data flow and contemporary Android architecture.

Enterprise Android delivery
Selected client experience — confidential details omitted

A high-level view of Android delivery across Royal Caribbean, Emirates NBD, and Walmart / Sam’s Club engagements.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering

Government Engineering College, Haveri · Visvesvaraya Technological University

Completed: 2015
